the pacific asia conference on knowledge discovery and data mining (PAKDD) has been held every year since 1997. PAKDD 2008, the 12th in the series, was held in Saka, Japan, during May 20-23, 2008. PAKDD is a leading international conference in the area of data mining. It provides an international forum for researchers and industry practitioners to share their new ideas, original research results and practical development experiences from all KDD related areas, including data mining, data warehousing, machine learning, databases, statistics, knowledge acquisition, automatic scientific discovery, data visualization, causal induction and knowledge-based systems. This year we received a total of 312 research papers from 34 countries and regions in Asia, Australia, North America, South America, Europe and Africa. Every submitted paper was rigorously reviewed by two or three reviewers, discussed by the reviewers under the supervision of an area chair, and judged by the program committee chairs. When there was a disagreement, the area chair and/or the program committee chairs provided an additional review. Thus, many submissions were reviewed by four experts. The program committee members were deeply involved in a highly selective process. As a result, only approximately 119 of the 312 submissions were accepted as long papers; 128 of them were accepted as regular papers and 115 of them were accepted as short papers.
